Private Cloud Market Analysis

2021 Predictions

Recap

2020

Prediction 3: The cloud industry will continue to proliferate around the globe

EXIT

Cloud Investment A - Scenario Planning

SCENARIO	EXIT VALUE
Wipe out – failure to launch GTM and compete against incumbents.	\$0
Downside case – company fails to grow meaningfully beyond a small set of customers.	\$100M
Base case – company succeeds in capturing meaningful market share.	\$500M
Upside case – company becomes market leader.	\$1B
Just goes nuts – company becomes go-to solution owning majority of market.	\$5B+

Global pandemic?

Prediction 1: The future of work will be remote

Welcome to the New Normal

Usage of digitally-enabled care skyrockets

Increase in
telehealth utilization

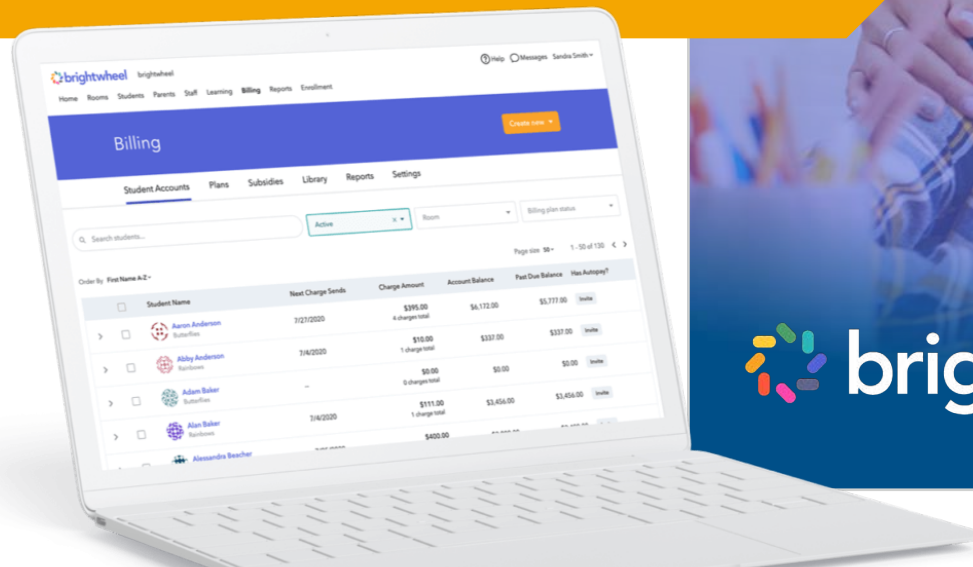

300x

Distance learning becomes the norm

93%

of households with school age children engaged in distance learning

Small and medium businesses evolve and adapt

The restaurant industry is going through massive digital transformation

Industries transition from offline to online

\$10T

global construction
industry accelerates
shift to the cloud

PROCORE®

The background image is a wide-angle shot of a construction site at dusk or dawn. In the foreground, there's a large, flat area with some construction materials and equipment. In the middle ground, several tall construction cranes are visible against the sky. In the background, there are modern, multi-story buildings with glass facades, some of which are lit up. The overall color palette is dominated by blues and oranges, suggesting a sunset or sunrise scene.

“

We've seen two years' worth of digital transformation in two months. From remote teamwork and learning, to sales and customer service, to critical cloud infrastructure and security—we are working alongside customers every day to help them adapt and stay open for business in a world of remote everything.

– Satya Nadella, CEO of Microsoft

Byron Deeter
@bdeeter

Microsoft picked Satya, the head of their Azure cloud business, to take over as CEO. Amazon just picked Jassy, the head of their AWS cloud business, to take over as CEO.

Current worldwide market cap #1 and #3 making the ultimate statements on the importance of cloud ahead!

Product-led
growth

Usage-based
pricing

Cloud
Marketplaces

1. Product-led growth

Attain market leadership by prioritizing user needs as they grow

“

Connecting the product team with customers was a massive unlock for us and helped to scale us to the upmarket company that we are. And the habit of being product-first persists. It's in our DNA.

”

INTERCOM

Karen Peacock, CEO of Intercom

Tremendous growth in market cap of public product-led growth companies

2. Usage-based pricing

Pick the usage-based value metric that is predictable and communicates product value

“

Startups send notifications to customers on demo day, IPO day and beyond. Providing a reliable product also means offering pricing that reflects the value they receive as they grow.

”

Troy Goode, CEO and founder of Courier

Leverage usage-based pricing to grow with your customers

Companies employing usage-based pricing have best-in-class net dollar retention, leading to a premium in valuations

3. Cloud marketplaces

One of many early adopters to see 10x YoY marketplace growth

“

Cloud Marketplaces have been a real accelerant for our business as they are helping us close larger deals faster. We have grown the number of deals through marketplace dramatically and are investing more to double down in this exciting channel.

”

Eugenio Pace, CEO and co-founder of Auth0

Digital channels provide promise and cloud marketplaces are the natural option

80%

of sales interactions will happen through digital channels by 2025

50%

faster sales cycles through cloud marketplaces

\$3B

predicted revenue through cloud marketplaces in 2021

Aim for a GTM flywheel that creates champions, not a static funnel

Fire up the flywheel to drive momentum

Results from Hyperscience's flywheel

300% YoY ARR growth
10x increase in platform usage
140% overall account growth
170% net ARR retention

Peter Brodsky, CEO and Co-Founder of Hyperscience

2021 Predictions

1. Unbundling of the Office
2. We're bringing S-M-B back with SaaS
3. Diversity, equity, and inclusion software take their rightful place
4. Data and machine learning infrastructure accelerates to new heights
5. The rise of the "citizen" developer and creator
6. Fintech and crypto players are changing financial services forever
7. The vertical SaaS wave becomes a tsunami

State of the Cloud 2021

Top takeaways

1. Cloud companies have not just reset in the New Normal, but have thrived (record-breaking market cap of \$2 trillion)
2. Changing of the guard: MT SAAS has overtaken FAANG
3. Cloud multiples are rising to new heights, with both public and private cloud trading for over 20x
4. Cloud growth rates and access to capital are at all-time highs, with the average Cloud 100 company growing 80% YoY and \$186 billion going into private cloud companies in 2020 alone
5. Good-better-best of growth endurance is 70%-75%-80%
6. GTM strategies have adapted to the New Normal; best practices include product-led growth, usage-based pricing, and the adoption of cloud marketplaces

Even in the New Normal, we're living in a cloud first world.
